Ellen...the only notes I took are scant but here is what I had down....

June 16, 2015

HudBay/Rosemont
(In person meeting)

Attendance:

HUDBAY
Patrick Merrin (Vice President, Arizona Business Unit) Britann O'Brien (Director, Corporate Affairs) Alan Mintz (Attorney, Van Ness Feldman)

EPA
Ellen Gilinsky
Clay Miller
Jason Brush (call in)

The following information was provided by the representatives of HudBay 1. HudBay expects release of the FWS Biological Opinion by the end of the month 2. The FEIS ROD is expected by the end of the year. 3. HudBay submitted a mitigation plan to the LA Corps district in September 2014....as of this time the corps has not provided a formal response to that proposed plan. 4. HudBay expects the corps to submit an NOI by the end of the year. 5. EPA has transmitted 3a and 3b letters on the proposed project

Jason Brush expressed concern that the project may result in a watershed drawdown thereby impacting downstream Tier III waters and that there was no proposed mitigation/or adequate mitigation to offset these impacts.

It was recommended that HudBay meet with R9 staff and management to discuss any recent

developments in information.
